Safety precautions ⚠

Only use the power supply unit supplied as indicated on the underside of the device.

Only insert **approved rechargeable batteries of the same type**. Never use ordinary (non-rechargeable) batteries as they may pose a health hazard or cause injury.

Make sure the rechargeable batteries are inserted the right way round (as indicated in the battery compartment),

Use the batteries specified in these operating instructions (as indicated in the battery compartment)

The phone may affect medical equipment so always switch your phone off before entering hospitals or doctors' practices.

The handset may cause an unpleasant humming noise in hearing aids.

Do not operate the phone in places where there is a risk of explosion (such as paint workshops).

The handset is not splash-proof.

Drivers must not use the phone while driving (including the walkie-talkie function).

The phone must be switched off at all times in an aircraft (including the walkie-talkie function). Make sure it cannot be switched on accidentally.

If you give your Gigaset to someone else you should also give them the operating instructions.

Dispose of batteries and the phone carefully. Do not pollute the environment.

Not all the functions described in these operating instructions are available in all countries.

# Contents

Preparing the handset

Delivery package

Gigaset 4000 Comfort handset, two batteries, charging unit, belt clip, operating instructions.

Inserting the batteries (automatic registration)

- Make sure you insert the batteries **the right way round** – see diagram on the left.
- **Replace** the cover and push gently **upwards** until it clicks into place.
- **To open** press the grooved area on the cover and slide back.
Before activating your handset, place it in the **Gigaset 4010/4015 Comfort** base station **with the display facing upwards**. The handset is automatically registered; this is shown on the display (e.g. INT1)

If registration is successful you will hear a confirmation tone (rising sequence).

Charging the batteries

Leave the handset for approx. five hours in the base station/charging unit to charge the batteries, as they are not charged when they leave the factory. The charging status icon flashes on the handset to indicate that the batteries are being charged:

▭▭▭ Batt. flat
      (battery symbol flashes)
▭▭▭ Batteries $^1/_3$ charged

▭▭▭ Batteries $^2/_3$ charged

▭▭ Batteries full

6

See the appendix for a list of recommended batteries.

● Once the initial charging process is completed you can replace your handset in the base station/ charging unit after each call. Charging is controlled electronically. This ensures optimum charging and prolongs battery life.
● The batteries heat up during charging. This is normal and not dangerous.
● Opening the battery compartment unnecessarily may cause the wrong charging status to be displayed.

Attaching the belt clip
Push the belt clip onto the back of the handset until the lugs at the side click into place.

Switching the handset on and off

📞   To switch the handset on and off, **hold down** the end call key until you hear a confirmation beep (rising tone sequence).

The handset is switched on as soon as you insert the batteries and place the handset in the base station/ charging unit.

Setting the date and time

You need to set the date and time so that the time that messages and calls are received is shown correctly.

≥	Open the menu.
⊙ Calendar/Clock OK	Select and confirm.
⊙ Date/Time OK	Select and confirm. The current setting is shown.

Enter the date

Enter the day/month/year. In this case 20.05.2001. e. g. 2ABC 0+ 0+ 5JKL 0+ 1∞

⊙ Go down one line.

Enter the time

Enter hours and minutes. In this case 19:05 e. g. 1∞ 9WXYZ 0+ 5JKL

⊙ Go down one line.

Select the display mode

use the left side of the control key to select the 12-hour mode (**am** or **pm**) or the 24-hour mode (default).

Save Save the settings.

Activating/deactivating the keypad lock

You can disable the handset keypad. If there is an in-coming call, the key lock is automatically deactivated and re-activated after the call has ended.

#⁀   To activate/deactivate, hold **down** key

Accepting a call: Press the talk key ⟨⟩ .

Changing the display language

≥   Open the menu.

H/Set Settings   OK   Confirm the function.

Language   OK   The current language is marked with a ✓.

OK   Select the language you want and confirm.

Displays for language settings:

Einstellungen	Sprache	**Deutsch**
H/Set Settings	Language	**English**
Réglages comb.	Langue	**Français**
Impostazioni	Lingua	**Italiano**
Ajuste terminal	Idioma	**Español**

Nastav. pren.c.	Jazyk	**Cesky**
Ust. sluchawki	Jezyk	**Polski**
El Cihazi Yyari	Dil seçimi	**Türkçe**

Dialling an emergency number

You can dial the emergency numbers saved in the base station even if the telephone lock is activated. Please refer to the operating instructions for your base station.

Registering the handset

To make calls with your handset, you must "intro-duce" it to its base station (registering)

● if your handset has already been registered at a **dif-ferent base station** (**steps 1**, **2** and **3**) or
● if you want to register the handset as a new hand-set at a **Gigaset base station of an older Gigaset range** (**steps 1** and **3**).

Step 1: On the **base station** or on the **base station telephone**:

Gigaset	On the base station or base telephone
4010/4015	Hold down the key on the underside of the base station.
3010/3015	Hold down the paging-key ● on the base station until you hear **signal tones**.
3020/25 3030/35 4030/35	Select `settings`, `system settings` and `register handset` in the menu at the base station telephone and confirm with `OK`.
3070/75 4070/75	Press the LED – it will flash during regis-tration.
Non-Sie-mens base stations	To register at "GAP base stations," follow the relevant operating instructions (steps 2 and 3).

Step 2: On the handset:

`≥☰`	Press the display key.
`⟨☝⟩ H/Set Settings` `OK`	Select and confirm.
`⟨☝⟩ Register H/Set` `OK`	Select and confirm.
`⟨☝⟩ OK`	Select the base station.

Step 3: On the handset:

`☐☐☐ OK`	Enter the system PIN and con-firm (factory setting 0000) – e.g. `Regstr.Procedure Base 1` is displayed.

Your handset is now ready for operation!

Your handset can be registered at up to four base sta-tions.

Making calls

Making an external call

📱	Enter the telephone number. If you make a mistake use the ⬅ key to correct individual digits.
🔲	Press the talk key.
🔲	Press the end call key to end the call.

- You can also press the talk key 🔲 **first** and then enter the telephone number - each digit will be dialled immediately.
- You can **cancel the dialling operation** by pressing the end call key 🔲.
- You can insert a pause: After entering the prefix, open the menu using the display key 📑 and select "insert pause."

Making internal calls

🔲	Open the list of internal users. Your own handset is identified by "<".
🔲 🔲 🔲	Select the handset you want and press the talk key.
or e. g. 2ᴬᴮᶜ	Enter the internal number of the handset.
or Call All 🔲	
or ✳🔔	All handsets are called.
🔲	Press the end call key to end the call.

Answering a call

Your telephone will ring (ringing tone) and the status LED will flash.

$\widehat{\curlyvee}$ / $\widehat{\text{ณ}}$ Press the talk key or handsfree key.

or $\widehat{\text{ณ}}$ ✦ 📱 Simply remove the handset from the base station/charging unit (factory setting: "Auto talk").

Open caller list/message list[*]

A message appears in the display and the status LED flashes to indicate that there are new calls/messages.

$\widehat{\boxtimes}$ Press

Handsfree talking

Handsfree talking offers the following advantages:

● Before dialling, you can hear the dial tone without having to lift the handset to your ear.
● Other people can listen in and join in the call.
● You can place the handset on any convenient surface or replace it in the base station/charging unit **with the handsfree key pressed**.

Handsfree talking when dialling

🎛 Dial the telephone number.

$\widehat{\text{ณ}}$ Press the handsfree key.

When **handsfree talking is activated,** the handsfree key $\widehat{\text{ณ}}$ and the status LED lights up.

---

[*] Not available in all countries

Handsfree talking during a call

(◁))   Activate handsfree talking.

To set the volume:
Press the handsfree key (◁))
once more.

(↕) (↕)   Raise or lower the volume.

Save   Save the volume level.

(talk)   Change from handsfree talking to the handset

(end)   End the call.

Forwarding an external call, enquiry call

You can forward an external call to another handset or make an internal enquiry call.

(↕)   Open the list of internal users.

(↕) (↕) (talk)   Select the internal user and call.

If the internal user answers:
● **To forward the call:** Press the end call key (end).
● To **end the enquiry call:** Use End to return to the waiting party.

Automatic redial

Manual redial

You have access to the last five telephone numbers dialled.

→→ (↕)   Display and select the telephone number.

(talk)   Press the talk key.

Automatic redial

This function is not available in all countries.

The handsfree key flashes and open listening is activated. **The function is deactivated after ten unsuccessful call attempts or if a call was made in the meantime.**

Press Off or any key if the person you called is not available.

→→ (⌖)   Display and select the telephone number.

≥   Open the menu.

Automatic Redial   OK   Activate.

☏   If the other person answers press the talk key.

Deleting a number from the redialling list

→→ (⌖)   Display and select the telephone number.

≥   Open the menu.

(⌖) Delete Entry   OK   The telephone number is deleted.

Copying a telephone number to the directory

→→ (⌖)   Display and select the telephone number.

≥   Open the menu.

(⌖) Copy to Directory   OK   The telephone number is entered.

⌗   If you like you can change the number and enter a name (you can also enter an anniversary s. page 20).
For notes on how to enter letters and characters s. page 17.

≥   Open the menu.

Save Entry   OK   Save the entry.

Directory and network access list

With the 🔄 **directory** you can store up to 200 tele-
phone numbers and then dial them at the push of a
button.

You can save the prefixes (Call-by-Call)* of telephone
companies in the **network access list** 🔄. The direc-
tory and network access list are used in exactly the
same way.

Storing an entry

🔄 / 🔄	Open the directory/network access list.
New Entry OK	Select the menu item and confirm.
🔢	Enter **the telephone number** (no more than 32 digits).
🔄 🔢	Scroll to the name field and enter **the name**. You can also enter an anniversary in the directory, see also page 20.
≥	Open the menu.
Save Entry OK	Store the entry

Dialling with the directory

🔄	Open the directory.
e. g. 3ᴰᴱꜰ 3ᴰᴱꜰ	Enter the first letter of the name. For example for "E" press the 3ᴰᴱꜰ key twice or scroll with the 🔄 key.
📞	Press the talk key.

After selecting the name you can also open the menu,
select Display Number , extend/change the number
and dial with the talk key 📞 .

* Not available in all countries

15

Dialling with the network access list (Call-by-Call)

(⁞●)   Open the network access list.

(⚫)⁞☰   Select call-by-call number and
                        open the menu.

Display Number OK   Select the menu item and
                        confirm.

▦   Enter the telephone number of
                        the person you want to call.

or

(⚫) (⚫) OK   Select the telephone number in
                        directory and confirm.

☎   Press the talk key. The telephone
                        number is dialled.

Speed dialling from the network access list

You can store 8 speed dialling numbers in the network access list. Enter a speed dialling number (2–9) **before** the name.

Example: Press speed dial key **2** and then enter the **network provider's name**.

Dialling with speed dialling

e.g. 2ᴬᴮᶜ   **Hold down** the key:
                        The stored network provider's
                        name is displayed.

e.g. ▦   Enter the telephone number

or

(⚫) (⚫) OK   Select an entry from the directory
                        and confirm.

☎   Press.

Character map

Press the relevant key repeatedly or hold down:

	1 x	2 x	3 x	4 x	5 x	6 x	7 x	8 x	9 x	10 x
1	␣	1	€	£	$	¥	¤			
2 ABC	a	b	c	2	ä	á	à	â	ã	ç

9 WXYZ	w	x	y	z	9	ÿ	ý	æ	ø	å
*	a→A	*	/	(	)	<	=	>	%	
0+	.	,	?	!	0	+	-	:	¿	i *
#	#	@	\	&	§					

*
Other characters on this key: ", ', ;, _

The **first letter** of the name is **automatically** written in **uppercase** and the rest in lowercase.

To change **one letter** from uppercase to lowercase or vice versa press ＊ .

Control the cursor with ⬆ ⬇ ⬅ ➡. Delete characters with ⬅

Letters are always inserted to the left of the cursor.

Inserting a blank ␣ before a name takes that name to the top of the directory (for example "␣Karla").

Sort sequence:

1. Blank (␣)	3. Letters (alphabetical)
2. Digits (0-9)	4. Other characters

Displaying, changing or deleting an entry

⬆️/☎	Open the directory/network access list.
⬆️	Select the entry you want.
View	View all the information for the entry.
Change	Open the input field and make the necessary changes.
📱	Change the number if necessary.
⬆️ 📱	Go to the name field and change the name. For notes on entering letters and characters s. page 17.
	For the directory enter an anniversary if necessary s. page 20.
▶≡	Open the menu.
Save Entry OK	Confirm the changes.

or

⬆️/☎	Open the directory/network access list.
⬆️	Select the relevant entry.
▶≡	Open the menu.
⬆️ Delete Entry OK	You will hear a confirmation tone. The entry has been deleted.

Copying an entry to another handset

You can copy an entry to another Comfort handset.

⬆️/☎	Open the directory/network access list.
⬆️	Select the required entry.
▶≡	Open the menu.
⬆️ Delete Entry OK	Select the menu item and confirm.
⬆️ OK	Select the internal user (receiving handset) and confirm.

Copying a further entry:

YES   Press.

(⟐)   Select the required number.

Copy   Initiate the copy process.

Copying the directory/network access list

You can copy the **entire** directory/network access list to another Comfort handset.
See "Copying an entry to another handset."

Transmission is interrupted:

● if the memory of the receiving handset is full (the last entry is displayed on the sending handset).

● if you receive a call.

Copying of an entry is terminated.

Deleting the directory/network access list

(⟐)/(⟐●)   Open the directory/network access list.

(⟐)   Select the required entry.

>≡   Open the menu.

(⟐) Delete List   OK   Select the menu item and confirm.

YES   Confirm delete all entries.

Entering anniversaries (birthdays and so on)

You can store the date and time of anniversaries so you can be reminded of them.

⬆⬇	Open the directory.
⬆⬇ View	Select and display the entry.
Change	Open the input field.
⬆⬇	Move the cursor into the birth-day/anniversary field.
Change	Confirm.
⌨	Enter or change the date (day/month).
⬆⬇ ⌨	Scroll forward one line and enter the time.
⬆⬇	Scroll forward one line.
◀▶ ◀▶	Choose the indicator for the alarm.
OK	Store entries.

Use the display key Delete to delete the anniversary alarm.

20

Settings

Setting the alarm clock

You can use your handset as an alarm clock.

Activating the alarm clock

If activated, the alarm clock ($\mathfrak{Q}$ icon) on your handset will ring every day at the time entered.

With the handset idle:

▸≣	Open the menu.
◉ Calendar/Clock OK	Select the menu item and confirm.
◉ Alarm Clock OK	Select the menu item and confirm. The current setting is displayed.
◉ ◉ Select On .	
◉	Scroll forward one line.
0+ 6ᴹᴺᴼ 0+ 0+	Enter the hours/minutes. The example here is 06.00.
◉	Scroll forward one line.
◉ ◉	Choose the ringer melody for the alarm call.
Save	Save the settings.

An alarm call will not be made if room monitoring (babyphone) is activated or during automatic redialling.

Deactivating the alarm clock

The alarm clock is set but you do **not** want it to ring.

|	
▸≣	Open the menu.
◉ Calendar/Clock OK	Select the menu item and confirm.
◉ Alarm Clock OK	Select the menu item and confirm.
◉ ◉	Select Off .
Save	Save the settings.

21

Turning off the alarm call

An alarm call is signalled like an incoming call. Press any key to turn it off.

Setting an appointment

Your handset is able to remind you of **one** appointment. If you have set an appointment, this is indicated by the Ⓠ icon in the display.

With the handset idle.

▸☰	Open the menu.
Calendar/Clock OK	Select the menu item and confirm.
Set Appoints. OK	Select the menu item and confirm.
	Select On to activate the appointment alarm.
	Scroll forward one line.
2ᴬᴮᶜ 0+ 0+ 5ᴶᴷᴸ	Enter the day/month. The example here is 20th May.
	Scroll forward one line.
0+ 9ᵂˣʸᶻ 3ᴰᴱᶠ 0+	Enter the hours/minutes. The example here is: 9.30.
	Scroll forward one line.
	Choosing the ringer melody for the appointment alarm.
Save	Save the settings.

An appointment alarm will only ring when the handset is idle. An appointment alarm is not made when room monitoring is activated or during automatic redial.

Turning off the appointment alarm

An appointment alarm is signalled in the same way as an incoming call; press any key to turn it off.

Missed appointments and anniversaries

An appointment and anniversaries that have been sig-
nalled on the handset but not been accepted are
saved in a list.

A new missed appointment/anniversary is indicated
by Appt.. Press the right display key to display the list
Events list. Then select Missed Appoint. ☒ OK.

If you want to view your appointment again, proceed
as follows:

⌦	Open the menu.
⌄ Calendar/Clock OK	Select the menu item and confirm.
⌄ Missed Dates OK	Select the menu item and confirm.
⌄ OK	Select a missed appointment ☒ or anniversary ⌨ Information on this entry is displayed.
	Use the display key Delete to delete the appointment/ anniversary.

Handset and loudspeaker volume

You can set the handset volume to one of three levels,
and the loudspeaker for handsfree talking to one of
five levels – **even during a call**.

⌦	Open the menu.
⌄ Sound Settings OK	Select the submenu.
Handset Volume OK	You will hear the current handset volume.
⌃ ⌃	Set the required handsfree talk-ing volume.
⌄	Scroll forward one line.
⌃ ⌃ Save	Select the required level for the handset volume and confirm.

23
Setting the ringer volume/melody

You can choose from **five ringer volumes**, **"crescendo" ring** (increasing volume), **ringer off** and any of **ten ringer melodies**:

▶☰	Open the menu.
⟨⟲⟩ Sound Settings OK	Select the menu item and confirm.
⟨⟲⟩ Ringer Settings OK	You will hear the current **ringer volume** and its level will be displayed.
⟨⟲⟩ ⟨⟲⟩	Select the ringer volume.
⟨⟲⟩	Scroll forward one line.
⟨⟲⟩ ⟨⟲⟩ Save	Select the required **ringer melody** (1–10) and confirm.

Time control for ringer volume

You can set a different ringer volume for a particular time of day.

▶☰	Open the menu.
⟨⟲⟩ Sound Settings OK	Select the menu item and confirm.
⟨⟲⟩ Ringer Settings OK	You will hear the current ringer volume and its level will be displayed.
Time C.	Press.
⟨⟲⟩ ⟨⟲⟩	Activate/deactivate time control.
⟨⟲⟩ ▦	Enter the period for the different ringer
e. g. 1∞ 1∞ 0+ 0+	
1∞ 5ᴶᴷᴸ 0+ 0+	from 11:00 to 15:00.
⟨⟲⟩ ⟨⟲⟩ ⟨⟲⟩	Scroll forward one line and select the ringer volume
Save Entry	Save the settings.
Save **or** ☞	Press.

24

Activating/deactivating warning and signal tones

● **Key beeps:** Every keystroke is confirmed.
● **Confirmation beeps:** Confirmation beep (a rising tone sequence) when you make entries/settings and when you replace the handset in the base station.
● **Battery low beep:** The battery must be recharged.

$\boxed{\geq}$ Open the menu.

$\overset{\triangle}{(\underset{\blacksquare}{})}$ Sound Settings $\boxed{OK}$ Select the menu item and confirm.

$\overset{\triangle}{(\underset{\blacksquare}{})}$ Advisory Tones $\boxed{OK}$ Select the menu item and confirm.

$\overset{\triangle}{(\underset{\blacksquare}{})}$ Select the required function.

$\overset{\triangle}{(\underset{\blacksquare}{})}$ $\overset{\triangle}{(\underset{\blacksquare}{})}$ $\boxed{On}$, $\boxed{Off}$ or select $\boxed{In Call}$ (battery low beep in the call).

Save Save the settings.

Auto talk feature on/off

When this function is activated you can remove the handset from the charging unit without pressing the $\diagdown$ key to accept a call (factory setting).

$\boxed{\geq}$ Open the menu.

$\overset{\triangle}{(\underset{\blacksquare}{})}$ H/Set Settings $\boxed{OK}$ Select the menu item and confirm.

Auto Answer $\boxed{OK}$ Activate/deactivate with $\boxed{OK}$ ($\checkmark$ = function on).

Resetting to the factory defaults

The directory, the network access list and the caller list are not deleted when you reset the handset. Registration at the base station is not affected.

≥☰   Open the menu.

(◊) H/Set Settings OK Select the menu item and confirm.

(◊) Reset Handset OK Select the menu item and confirm.

YES   Confirm.

Function	Factory setting
Handset volume	1
Ringer volume ("ring tone")	5
Ringer melody	1
Auto talk	On
Battery low beep	On
Handsfree volume	3
Room monitor level	high
Time control	off
Display language	local
Redialling list	deleted

Room monitoring (babyphone)

You can use your handset as a baby monitor.
The handset should be placed at least **1 to 2 meters** away from your baby. If a certain noise level is reached (for example if your baby is crying) the handset will automatically dial the **number you stored** (**internal or external**). When the room monitor is active, incoming calls are merely displayed.

Setting the room monitor

`>≡`		Open the menu.
Family/Fun	OK	Select the menu item and confirm.
Room Monitor.	OK	Select the menu item and confirm.
		Select On or Off .
		Scroll forward one line.
Change		Open the entry field for the telephone number. Delete an existing **external** number with ←. Delete an existing **internal** number with YES (you will be asked to confirm).
		Open the list of **internal** users and select the internal number.
OK		Save the number.

or

		Open the directory.
	OK	Select an external user.
`>≡`		Open the menu.
Save Entry	OK	Confirm the setting.
		Go down one line.
		Set sensitivity to "high" or "low".
Save		Save the setting.

Room monitoring can be deactivated with the display key Off .

You can **deactivate** the room monitor from an **external number** (from your mobile phone for example). Answer a call made from the room monitor.

Deactivate with 9^{wxyz} $\boxed{\#}$.
The room monitor is now deactivated. The room monitor will **no longer** call.

Walkie-talkie mode

This function enables handsets (Gigaset 4000 Comfort only) to communicate free of charge outside the range of the base station. In walkie-talkie mode, handsets are not available for incoming calls.

Requirements:
The handsets must have the same base settings (e.g. best base station) or they must not be registered at any base station. (Walkie-talkie mode reduces the handset's talk time considerably).

Activating walkie-talkie mode on the handset

>≡   Open the menu.

(✦) Family/Fun   OK   Select the function.

(✦) Walkie-Talkie   OK   Activate Walkie-Talkie mode.

Walkie-talkie mode can be deactivated with the display key Off .

Using walkie-talkie mode

Two handsets are in walkie-talkie mode:

Calling handset:

Call   Press.

Called handset:

The call is indicated by a message on the display.

Silent   Press.

📞   Press.
                                The two handsets are connected to one another.

📞   Press. The call is ended.

Appendix

Operating on base stations in the Gigaset family

Gigaset 1000/2000/3000

The following functions on your 4000 Comfort handset are **not** supported by base stations in this Gigaset family:

- Setting the time (the time is not transferred after the handset has been switched off)
- Changing the display language
- Room monitoring (cannot be switched off **externally**)
- SMS transfer (SMS-compatible base stations only)*

Gigaset 4010/4015 Classic

The following functions on your 4000 Comfort handset are **not** supported by the above-mentioned base stations:

- Changing the display language
- SMS transfer*
- Setting authorisation stages

* Not available in all countries

Looking after your phone

Wipe the base station and handset with a **damp cloth** or an antistatic wipe. **Never** use a dry cloth as this can cause static discharge.

Recommended batteries:

Nickel cadmium (NiCd)	Nickel metal hydride (NiMH)
Sanyo N-3U (700 mAh)	Saft VHAAH 1300 (1300 mAh)
Mobile Power 700 (700 mAh)	YDT 1200 (1200 mAh)
Panasonic P-60AA DT (600 mAh)	Panasonic HHR-110 AA (1100 mAh)
Emmerich 700 (700 mAh)	GP GP130 AA HC (1300 mAh)
	Sanyo HR-3U (1600 mAh)
	Emmerich 1300 (1300 mAh)

Always replace both batteries at the same time and only use batteries of the same type/manufacturer.

Operating times/charging time of the handset:

Capacity (mAh)	Standby time (hours)	Talk time (hours)	Charging time (hours)
700	up to 150	more than 10	about 5.5
1200	up to 250	more than 17	about 9
1600	up to 350	more than 23	about 12

The charge capacity of the battery reduces after a number of years. This is quite normal.

Range

The handset will operate away from the base station up to about 300 m outdoors and up to 50 m indoors.

Guarantee

If the telephone fails during the guarantee period because of poor workmanship or faulty materials Siemens AG will repair or replace it.

The guarantee period for Europe is at least 24 months (12 months up to 31.12.2001).

The guarantee does not cover damage caused by improper use, wear and tear or unauthorised repairs. The guarantee does not cover consumables or defects that have only a negligible effect on the value or operation of the telephone.

Service:

Siemens Service should be contacted if problems arise with the unit. Your specialist dealer will be happy to answer any questions on unit operation. Contact your network provider for questions concerning telephone connections.

The CE symbol indicates that the telephone complies with the essential requirements of the R&TTE directive.

Service telephone number see back cover.

The 4000 Comfort handset is approved for use in Switzerland and throughout the EU.
