

SAGEM WA 3050

SAGEM WA 3050: The wireless assistant from SAGEM

The SAGEM WA 3050 is both a powerful mobile phone and a digital personal assistant combined in a single, elegant and compact product.

Equipped with a powerful processor and a standard 16 Mb memory, it is one of the most impressive assistants on the market.

The SAGEM WA 3050 allows you to keep your professional and private lives under full control whilst on the move: access to Internet information and services, diary, address book, e-mails, multimedia... Pocket Word and Pocket Excel software makes it a real mobile pocket office.

Comfort and ease of handling

For improved visual comfort, the SAGEM WA 3050 has a wide, high-resolution touch screen. In addition, it is equipped with a character recognition system for the digitising of handwritten data.

The Windows Pocket PC interface allows you to navigate intuitively by means of menus and gives fast access to all functions through icons and pull-down menus.

All multimedia functions in your pocket

The SAGEM WA 3050 allows you to send and receive e-mails, SMS messages and faxes, as well as download texts, images and music from the Internet.

And as the SAGEM WA 3050 has an integrated multimedia drive, you can listen to MP3 files with its stereo headset or with the integrated loudspeaker!

Its infrared link facilitates connections with a PC or another personnel assistant for the synchronising of files, addresses and telephone numbers.

Access to a variety of WAP information and services

The SAGEM WA 3050 gives you access anywhere and anytime to a whole range of WAP and Internet information and services⁽¹⁾.

You can thus consult the stock market, get traffic updates, or the latest sports results...

An innovative phone

A new generation phone, the SAGEM WA 3050 comes equipped with high performance functions such as the hands-free system enabling you to talk and listen without having the phone to your ear and whilst looking at the information.

The built-in vibrating device notifies you have calls in total discretion. And because we don't always feel the same or want the same things, you can download new phone rings.

And for complete mobility, the SAGEM WA 3050 is dual-band GSM 900/1800⁽²⁾, GPRS, with an autonomy of 7 days in standby⁽³⁾ and weighs less than 200 grams!

Battery	Weight	Talktime (minimum duration)*	Talktime with DTX*	Standby time*	Size mm	Volume
Extra-flat Ion-Poly	198 g	1 hour 45	3 hours 40	130 - 185 hours	130.6x80.6x16.5mm	162 cm ³

* Dependent on operating conditions and network configuration. Standby times are calculated with a DRX from 3 to 9. Calculated on the TV09 standard. Battery life measurement technique V3 0.1 MOU association: Method of calculation for option 3: talktime: 2 h 20'; standby 120 h.

(1) Depending on services available.

(2) Depending on roaming agreements between operators and network structure.

(3) Talktime/standby times based on optimum operating conditions of the network.
