Game

Try out a game to test your skill with the Jog Dial.
Press the Jog Dial forward or $\textcircled{c}$ to suspend (pause) and use the Endkey to quit the game.

Sport fishing
Rotate the Jog Dial to adjust the length of the fishing line. Press the Jog Dial after the fish has taken the bait to get a hit with careful timing. After you get a hit keep an eye on the reel and use the Jog Dial to "land that fish!"

Clay Shooting
Rotate the Jog Dial to determine your target, then press the Jog Dial to fire the rifle. The more plates you knock down the higher your score.

Extras ` English `

Press the Jog Dial backward in the standby mode to access the Internet and E-mail or to open the Games Menu.
It is necessary to register with a service provider to use this telephone as a browser or for E-mail. In some cases registration has already been completed.
Check with your service provider in advance to confirm whether this phone has access to service. Also, check with your service provider when using this phone overseas.

Browser

You can visit various information sites on the Mobile Internet Service and Intranet information on your company. It is possible to access a variety of information such as news or weather reports from around the world, as well as regular sites on the Internet.

` Note `

• Internet access is limited to the sites that are configured in HTML or WML. WML's site is accessed using Wap. (the Wireless Application Protocol created for Internet service through mobile phones)
• You can not make phone calls when accessing the Internet.

Launching your browser
With the Flip cover open in the standby mode, press the Jog Dial backward then select Browser and the following menu is displayed. Rotate the Jog Dial and then press it to select an item from the menu. Press the Jog Dial forward to return to the previous screen.

Home : Access your homepage.
Favourites : Access, edit, and delete URL's that are bookmarked (see Launching the Browser from Favourites).
Settings : Configure the settings to access your Browser. Be sure to make these settings before using this service.

Launching the Browser from Favourites

To select Favourites press the Jog Dial while in the
Browser. Display a list of recorded URLs.
Rotate the Jog Dial to select the URL, then press it to
display the following menu.

Go :   Connect to the selected Favourites.
Move :   Change the order of your Favourites.
Edit :   Edit the Favourites name and URL.
Delete : Delete the Favourites.

Settings

The complete range of settings is displayed. The ▌
icon indicates the site that you have set as your home
site. To change your home site, after you chose a site
with the Jog Dial select "Set home" from the menu.
Select Edit and the following items can be set.

Name   Home page
Server type   Bearer service
Provider   GW server
GW port   Details

<Changing the "Server type">
You can access the contents of both WAP and HTML servers with this
browser. Select the type of server that you want to view in "Server type."

Note

The items that can be set depend on the type of server or operator.

Closing the Browser

Press the end key to disconnect (This is only when the bearer service is set
to data). Pressing the end key also closes the Browser.

E-mail

You can send and read E-mail by accessing to your office E-mail server or
your Internet service provider on the Internet (POP3 and SMTP are
supported).

Contact your service provider or operator directly for complete details for
setting information, as some service provider or operators do not provide
this service.

Be sure to make your settings before you start using E-mail.

Note

The maximum size of E-mail that can be sent or received is 2 Kbytes, including the
header.

Reading E-mail

After selecting E-mail from the Extras select Read to connect to your
server and display a list of incoming mail. Rotate the Jog Dial to highlight
the E-mail that you want to read, select it with the Jog Dial to read it. Also,
when you press the Jog Dial you can:

Reply :   Write a reply to the sender.
Go back : Return to the list.

Writing E-mail

After selecting E-mail from the Extras, select "Send" and you can compose
an E-mail.

To :   Input the address of people you want to send the E-mail.
Subject :   Input the subject of your E-mail.
Body :   Compose the text of your E-mail.
            Press the Jog Dial and select send to send the E-mail after
            inputting the above.

Settings

To send and receive E-mail you need to make the following settings.
Input your E-mail address correctly as indicated by your mail-server
manager or your provider.

Provider
   Dial-up number : The phone number to dial-up your provider.
   User name :   The user name to access your provider.
